

L20 ELED TORCH

An ATEX/IECEX intrinsically safe flashlight that has been designed to work in the most demanding conditions.

Powerful, robust and safe, the L20 is powered by 3 AA batteries and can be used by hand or attached to the firefighter helmet. It is available with a photoluminescent bezel and with step light diffuser to illuminate the path ahead.

Mount the L.20 flashlight to Pacific branded helmets with an Easi On/Off Base for torch using the L.20 torch clip.

A. BURN: up to 15 hours.

B. LIGHT OUTPUT: 220lm (280lm with Step Lighting Diffuser removed).

C. BEAM DISTANCE: 195m.

D. CONTROLS: Soft touch push button tail switch, switches light between ON and OFF.

E. POWERED BY: 3 x AA Alkaline batteries.

F. BODY: Impact resistant, anti-static thermoplastic resin.

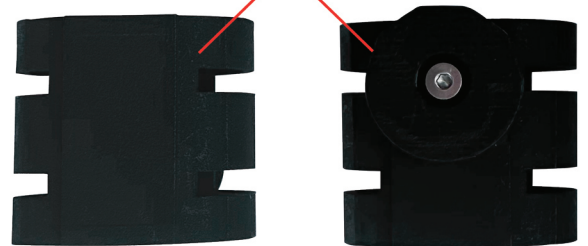

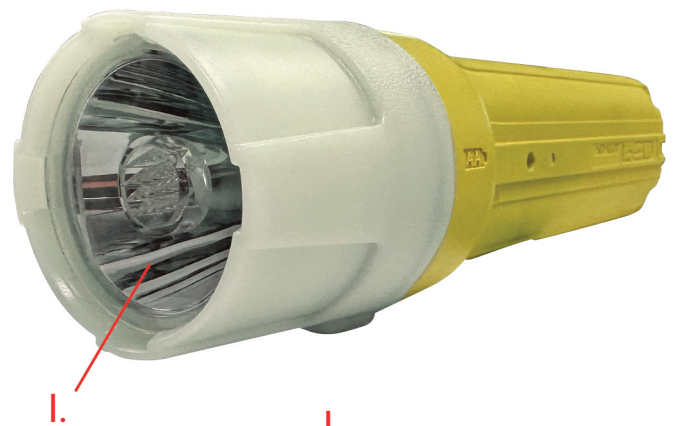

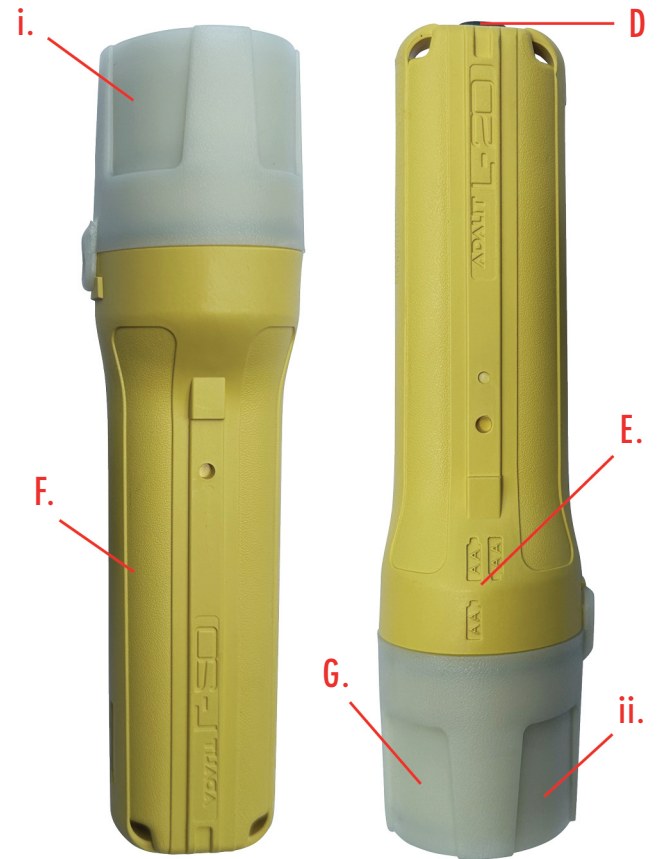

G. PHOTOLUMINESCENT BEZEL.

H. POWER LED-ENGINE OPTICS: a concentrated light beam that provides greater range and improves penetration in smoke.

I. STEP LIGHTING SYSTEM DIFFUSER, illuminates your path with a beam of light projected directly to the ground (diffuser removable).

J. HELMET TORCH: Can be mounted on Pacific branded helmets with an Easi On/Off torch base using Adaro L.20 torch clip - L2040PAC sold separately.

K. MADE IN SPAIN.
